

YOUR DATA IS OUR BUSINESS

Moving, Managing and Protecting Your Data

DYNAMIC SYSTEMS INC.®

Your Data Is Our Business

OPTIMIZING YOUR DATA ASSETS. Let Dynamic Systems address the data center challenges that can slow your business down, like server sprawl, data proliferation, cloud computing complexities, inoperability and security risks. Our solutions simplify and streamline data management. Plus, we can become your data management mentors, combining leading hardware, software and support to build custom solutions, including:

Enterprise Consolidation. Reduce management and power costs while improving backup efficiency and system up-time by combining solutions from Oracle, Symantec and other providers.

Virtualization. Get the most from your infrastructure by building desktop-, system- and storage-level virtualization solutions with Solaris, VMware and/or Oracle VM.

Thin Client. Deliver a robust computing experience to end users, including their familiar Windows desktop, and cut power consumption with eco-friendly thin client technology.

Online Services. Develop the infrastructure needed to offer your customers the cloud computing services that make your organization renowned and competitive.

Identity Management/Security. Manage, protect, store, verify and securely share identity data with solutions that feature data encryption, firewall, user authentication, access rights, account profiles and passwords.

Storage Management. Understand, then increase utilization while reducing complexity with advanced storage management tools.

Information Lifecycle Management (ILM). Streamline costs and data management efficiencies from beginning to end. Using a variety of leading technologies to assess, socialize, classify, automate and review data, ILM enables easy access and efficient backup of critical data from creation until no longer needed.

Data Management. Take control of your growing database with reliable storage, unimpeded backup and continuous access. While optimizing performance, realize high availability, plan for disaster recovery and develop custom applications. Leverage the power of the world's most sophisticated and secure database, then utilize Business Intelligence to support better business decision-making with your data.

KEY BENEFITS

Simplify Complex Environments

Increase Data Center Efficiencies

Reduce IT Costs

Optimize Existing Systems and Software

Streamline Support Service Management

DYNAMIC SYSTEMS INC.®

Your Data Is Our Business

WE DESIGN SOLUTIONS with a big picture view, filling a void for enterprises in the area of IT staffing and expertise. While designing solutions to best meet customer needs, we always take into account long-term business objectives and budgetary requirements. As an SDB with cleared resources and many contract vehicle options, we make it very easy for government and education customers to work with us.

TURN TO DYNAMIC SYSTEMS FOR AN ARRAY OF SERVICES:

Professional Services. Focus on your core business and let us provide professional consulting, capacity planning, architecture, customer education, maintenance and support.

Support Services. Dynamic Systems maintains hundreds of OEM products for one-stop Multi-Vendor Support. View, manage and budget for your assets under support via our online portal, Contract Management Center (CMC).

Electrostatic Discharge (ESD). Guard against the most serious threat to sensitive computing equipment – ESD. We use stringent environment control measures that meet ANSI/ESD S20.20 specifications.

Customized Product Deployment. We provide assembly/staging, hardware and software integration, custom configuration, burn-in testing, serialization, bar coding, asset tagging, installation and support on products from any manufacturer we sell.

Tech Talks. Dynamic Systems' highly certified technical staff provides on-site support and training for successful knowledge transfer.

Investment Protection. Leverage the equity in your current IT infrastructure through superior trade-up programs. We give flexibility that you need to solve the problems associated with aging technology, demanding business pressures and tight IT budgets.

Leasing. Utilize an alternative financing option through Dynamic Systems. We offer a competitive leasing program, making it easier for you to secure assets you need, but couldn't otherwise afford.

Service Plans & Warranties. Make sure your technology is optimized. We help manage service plans and warranties from mission critical systems to parts replacement, so you can focus on your core business.
