

# SIMPLIFIED, COMPREHENSIVE DATA MANAGEMENT

Let data experts move, manage, and protect your organization's most valuable asset — data.

## WHAT WE DO

Our expert engineers architect and build innovative, sustainable solutions. As both an integrator and systems provider, we are your security and data management mentors, converging professional engineering services with the leading hardware, software, and support to build custom solutions including:

### Professional Services

**Get expert Professional Services for optimum business performance.**

We have a team of seasoned and certified technical experts to help your organization transform to meet your future challenges more efficiently. We can help you adapt to the ever-changing digital landscape; by providing resources who understand your objectives, we are able to assist with the execution of those plans for your organization.

### Cloud Services

**Accelerate and optimize your Cloud journey for greater organizational efficiency.**

We have a team of cloud experts to help you kick-start your Cloud journey to thrive in the Cloud and mitigate all the risks that can stand in the way. We can help you create a robust Cloud adoption plan, accelerate time-to-value, scale your Cloud investments, and manage multi-cloud environments to keep pace with the continuously changing market.

### Dynamic Innovation Hub (DIH)

**Intelligently test and configure new technologies to get the highest ROI.**

Our DIH is designed to cater to the different product testing and configuration requirements of our clients. We have a rich and exclusive collection of resources for your product assessment and adoption needs so you can visualize how the new technology can impact your organization's performance and planning.

## Enterprise Compute Services

**Optimize Data Center management with superior database technology, flawless implementation, and seamless operation.**

We have a dynamic team of experts to help you analyze, optimize, and better manage your data center and cloud processes and assets. Our Enterprise Compute Services take the complexity and uncertainty out of your environment while reducing costs and improving productivity.

## Security Services

**Safeguard your organization against cybersecurity risks.**

Drive your business and manage your risk footprint with Dynamic Systems' cybersecurity team. No matter where your data resides, we can help you build an effective, end-to-end, security platform that protects your digital assets and helps ensure uninterrupted operations.

## Support Services

**Ensure business continuity with flexible and scalable Support Services.**

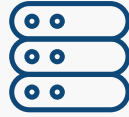

We have a stellar team of experts that brings a relentless focus on customer satisfaction and the attention to detail that your organization requires. We can work with you to evaluate your current support challenges, understand long-term maintenance goals, ensure software licenses are properly maintained, and manage budget considerations. Whatever your support needs are, our team of experienced advisors is ready to guide you.

## KEY BENEFITS

Simplify complex environments

Increase Data Center efficiencies

Reduce IT costs

Optimize existing systems and software

Streamline support service management

Single point of accountability

## WHY DYNAMIC SYSTEMS INC.

We design solutions with a big picture view, filling a void for enterprises in the area of hardware and software architecture along with IT service expertise and staff augmentation.

While designing solutions to best meet customer needs, we always take into account long-term business objectives and budgetary requirements. As a Woman-Owned Small Business with cleared resources and many contract vehicle options, we make it very easy for government, state & local, and education customers to work with us.
